Where School Community Connects

School & School Network Terms

Updated September 17, 2026

Schools, PTOs, teams, and school networks are responsible for the content they publish, the permissions they grant, and the accuracy of their organization records.

Organization administrators

Administrators must use access only for legitimate community purposes, remove access when responsibilities change, and avoid uploading information they are not authorized to share.

Payments and activities

Organizations remain responsible for their events, volunteer programs, refunds, financial decisions, and compliance obligations. The platform does not become the organizer merely by providing coordination tools.
